

Dynamic Web

Things to Cover Today

1. Learn about Node, Express, and creating a server with JavaScript
2. Go through setting up a server
3. Take time in class to work through Exercise 3
4. If you finish Exercise 3 (you should...) work on Midterm

Node

1. What is Node?
2. Why are we using Node?
3. Where can you deploy Node servers?

Express

1. What is Express?
2. Why are we using Express?
3. Are there alternatives?

Setting Up a Node Server

(Follow Exercise 3 on Github)

All of the requirements for Exercise 3 are from the Express and Node docs (which are linked to in the resources of Exercise 3)
